# DI Rig Analytics

Industry-Leading Rig Data

Drillinginfo revolutionized the rig count process by tracking over 95% of the U.S. rig fleet on a daily basis, primarily through the use of GPS units. Use DI Rig Analytics to stay ahead of the competition, identify new opportunities and investments, and save time and money.

BE THE FIRST TO ACCESS NEW INFORMATION

Stop waiting on weekly rig counts that are often outdated by the time they are published. DI Rig Analytics has the most complete rig count on the market, and is the only service that provides daily updates. Act on information before your competitors have even seen it.

IDENTIFY NEW OPPORTUNITIES

Drill down into details about which plays are being explored, where drillers are working, and how effective rig crews are. Analyze historical data to identify trends and discover new business opportunities.

MAKE SMARTER INVESTMENTS

DI Rig Analytics offers unmatched insights into driller and operator performance. Understand driller–operator relationships and dominance in a given play, evaluate operators' logistical efficiencies related to rig movements, and categorize active rigs by horsepower to better forecast new production.

TIME AND MONEY SAVINGS

With DI Rig Analytics, you no longer have to sift through multiple sources or wait for trade shows to find the right information. Now, all the data you need to make smarter, faster decisions is available with a few clicks.

FEATURES AND BENEFITS

FEATURE	BENEFIT
Metrics map	Easily visualize rig movements and quantify operators' logistical efficiencies
Well starts through time	Track well starts through time; chart which operators and drillers are active and where they are active from month to month
Relationship tree	Visualize relationship diversity between drillers and operators and estimate operator capital budgets in an area
Multi-visit map	Determine locations which multiple rigs have visited a single well or API
Snapshot comparison	Compare rig counts between two given dates; drill down into differences between plays, drillers, operators, etc. for a comprehensive analysis
Utilization	Track the percentage of active rigs in a fleet; visualize utilization by driller, operator, play, rig class, etc.
Timeline	Drill down into details about a specific rig over time to see visits colored by API and compute time on location
DUC wells	Visualize wells that are drilled but uncompleted broken down by operator, location, trajectory, etc.
DUC historic	View waterfall chart and map view of drilled, expired, and completed wells over time
Daily updates	Receive daily rig location and status updates for 95% of North American active, marketed, and stacked rigs
Active rig count	View active rigs through filtering by play, state, country, rig class, operator, and driller
Dataset	Easily export an entire dataset to CSV

PROACTIVE   **EFFICIENT**   **COMPETITIVE**

By monitoring the market, Drillinginfo continuously delivers innovative oil & gas solutions that enable our customers to sustain a competitive advantage in any environment.

Drillinginfo customers constantly perform above their competitors because they are more efficient and more proactive than the competition.
