

Drillinginfo Web App Export Guide

The DI Web Application offers three core ways to export your search results or charts based on your selected filter criteria – the **Export Wizard**, the **Export Table**, or **Export from Chart**. Additionally, the **Export History** functionality maintained within the Export Wizard keeps a running record (for a maximum of seven days) of all your exports - including those used outside the wizard. This allows you to easily download your results later or review your most recent previous exports.

Overview

- The **Export Wizard** can be found in the left-side menu options.
- **Export Table** is a one-click operation. Table data exports are automatically downloaded when complete using a default name. You will still receive an email with a download link and be able to download the file again from **Export History**.
- Export Wizard now has an option to automatically download the file when ready.

Tips:

- Filter down to the required limit before starting your export process.
- Verify the dataset selected in the **EXPLORE** panel matches the dataset chosen for your export format. For example, filter on the Production dataset for a Production Time Series export.

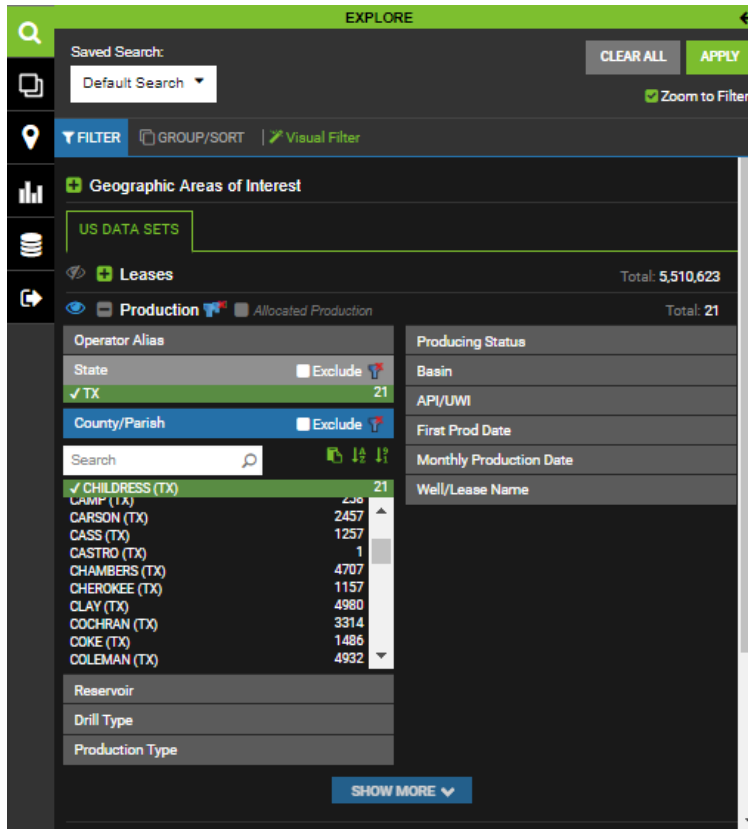

Filter Limit Parameters by Dataset

When exporting data, the following limits for each export type allow you to access what you need without going back to the **EXPLORE** panel to further limit your search (Figure 1).

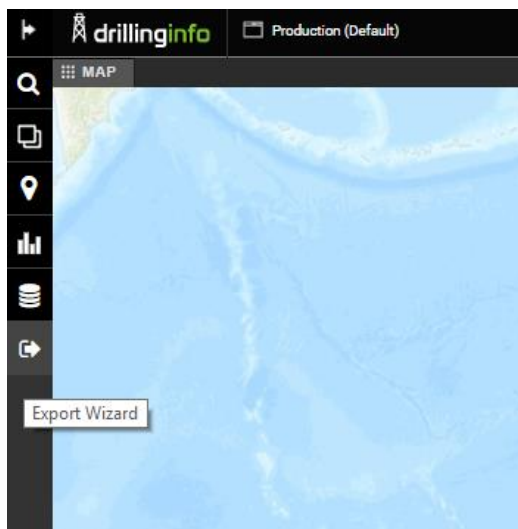

Data Set	File Type	Filter Limit
Production Data Set		
Production Time Series	.CSV	Less than 100,000
Production Headers	.CSV	Less than 1,000,000
DRI	.DRI	Less than 100,000
Wells (Play Assessments) Data Set		
Wells (Play Assessments)	.CSV	
Rigs Data Set		
Rigs	.CSV	
LandTrac Lease Data Set		
LandTrac Lease	.CSV	Less than 250,000
LandTrac Lease	.SHP	Less than 100,000
Wells Data Set		
Well Tests	.CSV	Less than 250,000
Formation Tops	.CSV	Less than 250,000
Wells (Plays Assessments)	.CSV	Less than 250,000
Directional Surveys	.CSV	Less than 10,000
Well Logs	.LAS	Less than 50
Well Log Rasters	.TIFF	Less than 50
ASCII4	.WB4	Less than 250,000
Permits Data Set		
Permits	.CSV	Less than 250,000
Leases Data Set		
Leases	.CSV	Less than 250,000
Landtrac Unit Data Set		
LandTrac Unit	.CSV	
LandTrac Unit	.SHP	Less than 100,000

EXPORT WIZARD

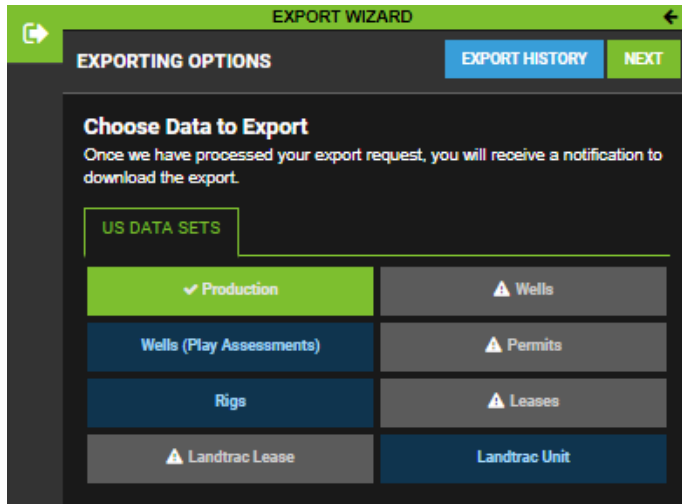

1. Open the **EXPLORE** panel to filter on your preferred dataset.

2. Click on the **Export Wizard** icon.

3. Select your dataset type.

4. Click **Next**.
5. Choose your preferred **Export Format**. Detailed descriptions of our export formats are available [here](#).

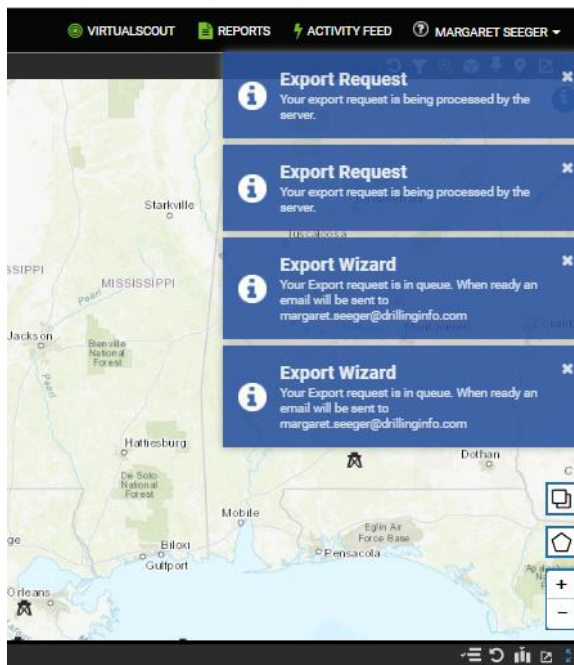

6. Name your **Export** and verify your email address.

7. Click the **Finish Export** button to continue.

The screenshot shows the 'EXPORT WIZARD' interface. At the top, it says 'EXPORT WIZARD' with a back arrow. Below that is the section 'Choose Export Options'. Under 'NAME THIS EXPORT', there is a text input field containing 'Production Export One'. Under 'EMAIL ADDRESS', there is a text input field containing 'jane.doe@drillinginfo.com'. There is a checked checkbox labeled 'Download Automatically'. At the bottom, there are two buttons: 'BACK' on the left and 'FINISH & EXPORT' on the right.

Status messages will appear in the top right per export type.

You will also see an automatic download as soon as your request is done processing. This is in addition to the export being delivered to the specified email address.

Greetings!

Your DRI export is complete. Click [here](#) to download.
Export ID: b200e826-512a-4d5c-b7c0-a196974c2d32
Description: Production Export One DRI

This export will expire in 7 days.

Please do not respond to this automated email address. If you run into problems downloading, please contact DrillingInfo support at 1-888-290-7697 and reference the export ID in the subject line. You can also forward this email to support@drillinginfo.com with a brief explanation of the problem.

Sincerely,
DrillingInfo

Your export will now also appear in your **Export History** for seven days.

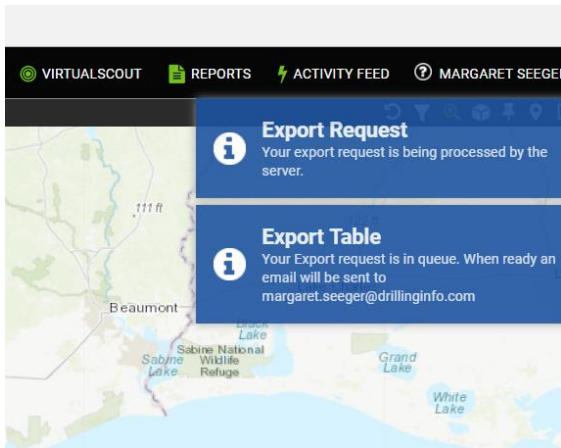

EXPORT TABLE

1. Open the **EXPLORE** panel and filter on your preferred dataset.
2. Once results are returned, click on the **Export Menu** and choose **Export Table**.

Cum Gas	View/Copy API List
0	1021
4175	6832
3501724	
1889154	
1755828	92697
1364740	47741
1890161	65484
3091535	65415
2723372	91214

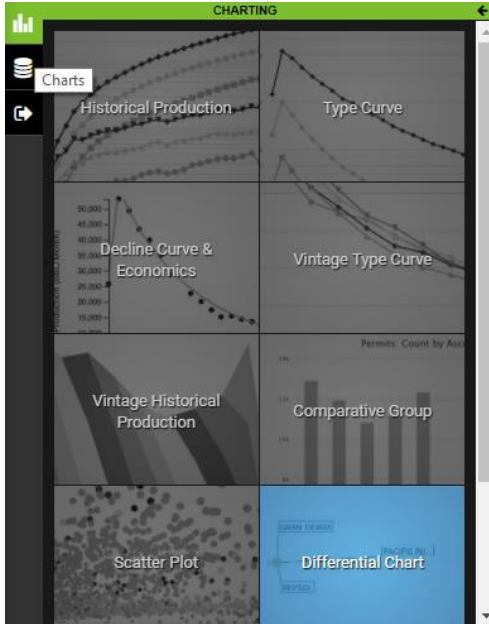

Status messages will appear in the top right updating you on the status of your request.

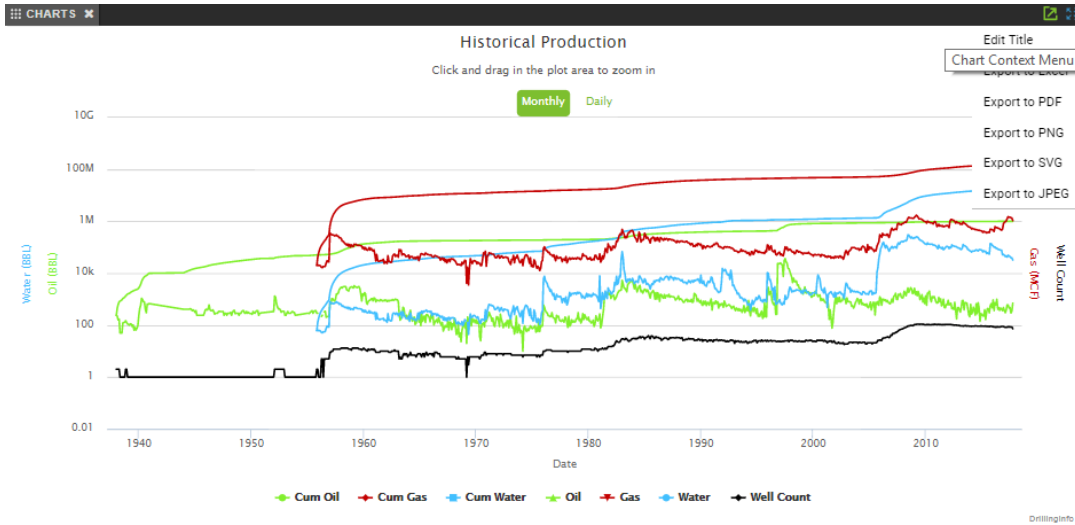

3. Check your email and download the provided export.
*Your export will now also appear in your **Export History** for seven days.*

EXPORT FROM CHART

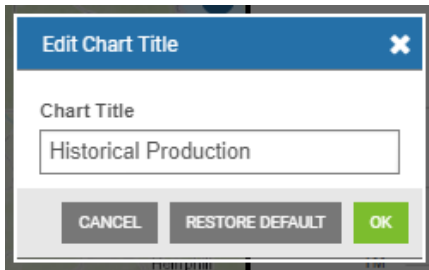

1. Open on the **EXPLORE** panel and filter on your preferred dataset.
2. Click on the **Charts** icon.

3. Select your preferred **Chart** option.
4. Once the chart returns, select the **Chart Context Menu** icon.

5. Select **Edit Title** to adjust your chart title if necessary. Click **OK** when done.

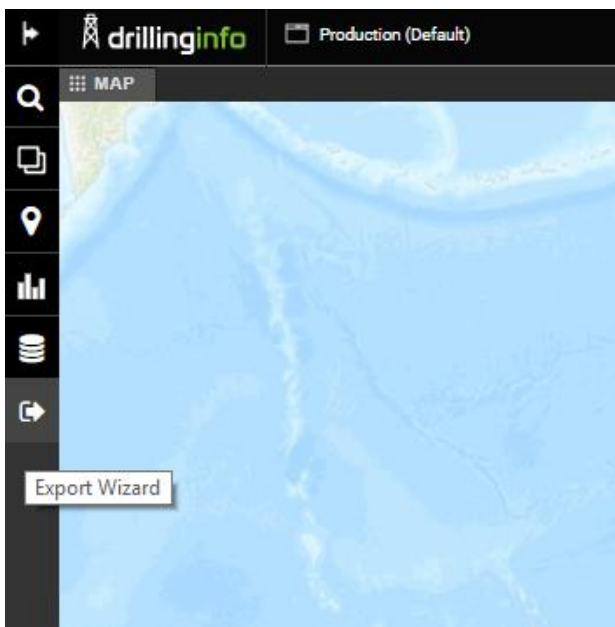

6. Return to the **Chart Context Menu** and select your preferred export option – Excel, PDF, PNG, SVG, or JPEG.
Your download will begin automatically.

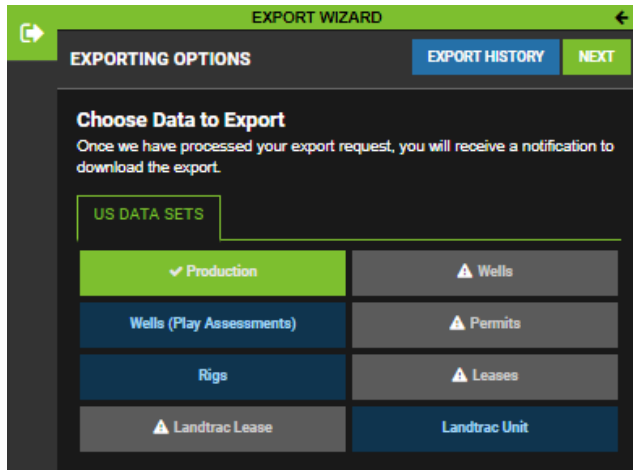

EXPORT HISTORY

Export History is where you can easily access your previous exports for up to seven days from within the **Export Wizard**.

1. Click the **Export Wizard** icon.

2. Click the blue **Export History** button.

Export History list appears. From here you can select **Download** to view any of your exports from the last seven days.
